Ali Ahmed

Founder at B2W-ai | Engineer at WSP | Columbia M.Arch 2023
Washington, District of Columbia, United States

Summary

Product Manager adding value on GTM, Business Development, and Product Design teams using Frontend Development, Full-stack Engineering. Ali has managed AI, ML, and Data Analytics projects adding nearly \$100M in value across VC-backed startups, federal contracts, and enterprise software. Building the future of AI Systems for Architecture, Construction, and Engineering (AEC) by developing agents that work off price-build models.

Experience

WSP

Senior Data Analyst

August 2022 - Present (3 years 8 months)

Washington DC-Baltimore Area

Architected high-throughput data infrastructure and real-time systems to modernize transit intelligence. I led the technical roadmap for a Go/Kinesis ingestion pipeline processing 50k+ events/sec, achieving an 80% improvement in data freshness through a shift to event-driven architecture. By bridging the gap between backend scalability and UX constraints, I drove cross-functional alignment that accelerated release cycles and optimized system-wide performance.

LaunchGood

Design Manager

2021 - 2022 (1 year)

Managed Design Systems sphere to create unity between UX and Customer Engagement design processes.

Met with design teams weekly to ensure consistency in Notion documentation with Figma embeds to develop copy with Chief Design Officer.

Oversaw KPI development for brand performance using 1500 copywriting A/B test using Notion AI and Python on Notion..

huhu

Head of Design

2019 - 2022 (3 years)
New York, New York, United States

Norman Foster Foundation
Architectural Designer
2019 - 2020 (1 year)
Madrid, Community of Madrid, Spain

Collaborated with Lord Norman Foster and MIT Media Lab for extensive on diagnosing slum dwelling worldwide for a sustainable alternative as one of ten select global designers.

NASA - National Aeronautics and Space Administration
Space Suit Engineer
2018 - 2019 (1 year)
Houston, Texas, United States

- Focused on materials testing
- training computer vision models for object recognition integrated into space suit helmets heads up display.
- prototyped soft goods hardware for self egress implemented on space suit harness within mars suit cockpit.

Autodesk
AR Exhibits Engineer
2017 - 2017 (less than a year)
San Francisco, California, United States

Bragi
Design Engineer
2016 - 2017 (1 year)
Munich, Bavaria, Germany

Autodesk
Applied Innovation Engineer
2016 - 2016 (less than a year)
San Francisco, California, United States

Presented software functionality within \$4M software development to generate report to CEO, Carl Bass.

Tested design environment for benchmark 15% optimized user experience by developing robotics using 3D-print generation, Computer-aided sketching, and multi-material FEA animation.

Honestly, this job was a playground where I tested their software, hung out with the CEO, and got amazing advice from the leading CAD CTO in the world.

Education

Columbia University in the City of New York

Master's degree

The George Washington University

Bachelor of Science - BS, Mechanical Engineering

American School of Doha

High School Diploma, High School/Secondary Diplomas and Certificates

American Community School of Abu Dhabi
